

Innovation in Construction FORUM 2016

NOVEMBER 8-9
UNIVERSITY OF ALBERTA
EDMONTON, ALBERTA, CANADA

BE PRESENT — BE INFORMED — BE ENGAGED

It is the vision of the ICF to inform, stimulate research, encourage sharing of ideas, and promote innovation within the Alberta construction industry. ICF attracts delegates from local and international construction, engineering, and academic communities. It is a vital meeting of minds where expert researchers and practitioners spark each other's ingenuity to realize positive industry change.

WHY ATTEND ICF

Our 2-day program is focused on providing delegates with insights and skills that improve leadership, stakeholder relations, and best practices. Esteemed speakers from local and international construction, engineering, and academic communities will deliver engaging presentations, host panel discussions, and offer interactive workshop sessions.

PRESENTATIONS AND WORKSHOPS

- Organizational changes and project development
- Leadership in construction engineering
- Construction management following disaster recovery
- Health and productivity
- Lessons learned in municipal infrastructure construction
- Construction procurement management
- Stakeholder relations

Visit our website to view full program including presentation abstracts!

WHO WILL BE THERE

Previous ICF Forums have attracted over 140 participants from local and international construction, engineering, and academic communities.

REGISTER TODAY

Respecting today's economic challenges we are offering affordable registration with discounts for multiple registrations.
