

I, on behalf of _____, agree to support CCIInnovations in its endeavour to create a Supercluster
(firm)
on Infrastructure-Transportation

Name _____

Title _____

Signature _____

Address _____

Date _____

Our firm understands that the money requested from government needs to be matched by industry. We understand that contributions made by other levels of government, the public owners (end-users) of the infrastructure-transportation systems, cannot be considered as matching funds. We believe this provision in the program should be reconsidered for our sector. The public owners (end-users) in our sector are a very few agencies that procure a huge amount work on behalf of the public. They, and the Canadian public, would be the direct beneficiaries of every success created through the Supercluster on Infrastructure-Transportation.

Given that our sector was only included in the Supercluster program in Budget 2017, it is difficult, at the corporate and industry level, to determine/confirm our level of financial support. This is a major undertaking that requires awareness, education and a great level of coordination. At this time, we are committed to dedicate the in-kind support required to ensure CCI's application is a success. If successful in the LOI process, CCI will endeavour in the coming months to have all the necessary matching funds in order to proceed with the full application.
